

Wavlink USB 3.0 Universal Dual Display Docking Station

Wavlink USB 3.0 Universal Dual Display Docking Station Working With Gigabit Ethernet. Supports HDMI/DVI/VGA, 6 USB Ports(2USB 3.0 + 4USB 2.0), Audio Output/Input for Laptop/PC/Mac

Brings Technology to Life – For Online work, Online Class, Virtual Meeting and Hybrid Training

With the portability of today's technology, Laptop, tablets and ultrabooks are fabulous tools for busy people on-the-go. But as tablets and ultrabook are limited in screen size and often lacking in ports, using them more effectively by connecting them to other monitors, speakers, printers, external disk drivers and all of your other desktop USB peripherals. The Wavlink UG39DK4 allows you to do just that. With its sleek, easy-to-use design and featuring Display Link technology, the docking station enables multiple USB2.0 and USB 3.0 devices to be connected to your laptop, Macbook, or Windows.

Universal Connectivity for a Powerful Workstation

A single cable from your notebook to the docking station provides connection to two monitors, various external devices and Internet. You can instantly expand and customize your workspace with the HDMI, DVI or VGA ports to connect multiple monitors in HD 1080P, to use more devices and hence allowing you to multi-task.

Enhance Capability

With one simple cable connection to your PC or notebook, you can have access to a large screen display, stereo speakers, external hard drives, optical disk drives, printers, keyboard, camera, speaker, microphone and other USB devices. The versatile USB docking station features three external monitor output (HDMI, DVI or VGA) that can be used in either HDMI, DVI or VGA combinations to extend or duplicate your desktop. Each video output supports HD video resolutions (2048 × 1152) and HD video playback for a good solution to expand your notebook video capability.

Features:

- Two USB 3.0 ports give you access to Superspeed data transfer rates of up to 5Gbps.
- Four USB 2.0
- Supports simultaneous HDMI and DVI displays output, allowing you to extend your computer to two display [TV or Projector]
- Gigabit Ethernet port supports up to 1Gbps speed for wired connectivity to the Internet.
- Supports Windows 10/8.1/8/7 & Legacy XP systems,
- Mac OS X based on intel processor.
- Compact size, LED display status, easy to setup, multi-function operation performance bring you new lifestyle.

Specifications:

- Voltage: 240V
- Operating Temperature: 0°C~40°C
- Storage Temperature: -10~70°C
- Power Supply: 12V/2A
- Port: USB3.0/2.0 HDMI Gigabit DVI DC
- Processor: 2.0Ghz Core2Duo or better
- RAM: 1GB
- Recommended Requirements(Full-Screen Video Playback)
- Processor: Core i3 i5 or i7 2 + GHz
- RAM: 4GB
- Dimensions: 223 x 87 x 30 MM
